

## NOT RECYCLABLE WASTE

Waste called “not recyclable” are usually made by dry material. This type of trash cannot be recycled and that’s the reason why they go on waste dump.

**YES**

Rubbish, dvd, cd, toys, pens, shoes, diaper, boxes, small plastic objects

**NO**

Recyclable waste

**ATTENTION!!!** Inside the bin there is a chip (a sort of mark) which will be read every time it is emptied. **The number of emptying establish a part of the collection service fee.** Always check your bin!!

### HOW DO YOU CONFER IT?

Filling the tip up when they are full, the night before the day pre-established. Trash must be put inside closed boxes and not in confusion.

### **ATTENTION!!**

we invite you to take care of your assignment to avoid the failure or the double emptying

you should never see this note on your bin if the conferment is regular

### WHEN THE COLLECTION TAKE PLACE?

Every week, on Tuesday.

### WHEN AND WHERE IS IT DIGESTED?

It is digested for a fee in the dump or in thermos-development installations.

## **!IMPORTANT!**

**Domestic incineration of waste is illegal, it pollutes the environment and damages your health.**

## ORGANIC WASTE

Domestic organic wastes **can be recycled**, and they represent the 15% of waste produced in Montegalda. The separation from other type of rubbish allows to produce, after specific treatments, a fertilizer called *compost*. Or, if it is awarded in specific installations, allows to produce energy through the biogas. It is very important to separate this type of rubbish from the not-recyclable dry waste, because when it decomposes, it can generate big problems at the environment and produce bad smells.

**YES**

Scrap of food, fruit, vegetable, coffee, bread; domestic plants, flowers, ash

**NO**

Stones, ground, metal, wet rags, diapers

### HOW DO YOU CONFER IT?

Inside the brown bins. Waste must be put inside closed boxes to avoid bad smells or even spill of liquids.

### WHEN THE COLLECTION TAKE PLACE?

It happens twice a week, on Monday and Friday.

### WHERE AND WHEN IS IT DIGESTED?

The waste will be lay down temporary in a pouring station and then it will be digested in specific installations to produce new energy.

## RECYCLABLE WASTE

!! No more plastic, aluminum and canned food inside bins!!

This three type of waste can be recycled because they are made by special material, which can be worked again.

### HOW DO YOU CONFER IT?

Both three different type of material must be conferred in the same plastic box given by the district.

### WHEN THE COLLECTION TAKE PLACE?

The collection take place every 3 weeks, according to the calendar predisposed by SORARIS society.

### WHEN AND WHERE IS IT DIGESTED?

The boxes of this different type of waste are conferred by Acovis Installations of Sandrigo that, through specific systems, can separate iron, plastic and aluminum material. Once they are separated and packed, they will be regenerate. In this way, the material is not a waste anymore, but a primary good.

**REMEMBER:** All the containers **must be washed** before putting them inside the boxes

**YES** Plastic bottles, tuna tins, aluminum tins other kind of boxes/tins

**NO** toys, electrical appliance, boxes of Dvds, plats, glasses, plastic objects, iron waste

### !!ATTENTION!!

The empty containers must be washed before putting them inside the boxes, to avoid spill of liquids. The night before the pre-established day, the boxes will be put outside.

## RECYCLABLE WASTE

!!No more glass long the road!!

Glass is one of the easiest material to identify and recycle. Sometimes it is also called “clean material” because it is not produced with polluting things and can be easily recycled.

**YES** Bottles, glasses, vases

**NO** Pottery or china objects, light bulbs

### HOW DO YOU CONFER IT?

Glass packaging must be put inside the small bucket given by district and **NOT IN OTHER BOXES.**

### WHEN THE COLLECTION TAKE PLACE?

The collection take place every 3 weeks according to the calendar given by SORARIS society.

### WHEN AND WHERE IS IT DIGESTED?

Only glass material will be digested in a glassmaker, then it will be melted and worked again.

This view , with the new system of waste collection, will be never seen again

### ATTENTION!!!

You must wash the empty bottles of iron before putting them inside the boxes, to avoid the spill of liquids. The box must be take out the night before the day pre-established. If necessary, it can be conferred in specific installations.

## RECYCLABLE WASTE

!!No more paper along the road!!

Paper, is a cost if it is conferred in a dump, it's a revenue if it's recovered. The most important aim is to differentiate paper not only at home (as an example paper boxes), but even at school (books) and at work (documents and general paper).

**YES** newspapers, books, documents, paper boxes, paper packaging

**NO** oiled paper, nylon, chemical paper, chemical paper

### HOW DO YOU CONFER IT?

Paper must be packed or deposited in specific boxes.

### WHEN THE COLLECTION TAKE PLACE?

Every 3 weeks, according to the calendar given by SORARIS society.

### WHEN AND WHERE IS IT DIGESTED?

Paper material is digested in a paper mill, macerated and then regenerated. Then paper will be put in circulation again.

This view , with the new system of waste collection, will be never seen again

### ATTENTION!!!

DO NOT USE PLASTIC BOXES.

They must be put outside the night before the day pre-established.

City di Montegalda

## CONFERMENT OF RECYCLABLE WASTE

In the Ecocentro can be conferred recyclable waste such as:  
**PAPER, PLASTIC, GLASS AND CANS**

- + **VERDE E RAMAGLIE** Brushwood, tree pruning, plants, leaves, vegetable residue
- + **LEGNO** Only wood coming from its building, home furnishings and packaging keep going on with its vital cycle.
- + **INERTI** Small demolition material, of domestic origin
- + **OLI** Oil conferred separately from the vegetal one to the mineral one
